

An Introduction to Basic Stream and River Functions Webinar

March 1, 2017

12:30 pm - 1:30 pm

STREAM RESTORATION EDUCATION FOR HIGHWAY ADMINISTRATORS, PLANNING COMMITTEES, AND LOCAL AND STATE DECISION MAKERS

Trout Unlimited, Inc., the US Forest Service, and the US Fish & Wildlife Service are hosting a webinar as part of their mission to engage local, regional, and state stakeholders throughout the northeastern US in creating more flood resilient communities.

This webinar will take place 1 week prior to the ***Flood Resiliency & Stream Restoration Workshop*** in Hadley, MA, and will serve as a means of familiarizing ourselves with basic stream and river functions, the potential impacts infrastructure plays on those natural systems, and assessing infrastructure vulnerability.

A preview of items to be covered in the March 8 workshop will be provided. There will also be time for questions and answers.

Topics to be covered:

- Basic stream and river functions;
- The role of floodplains;
- Impacts to streams and infrastructure in the built environment;
- Infrastructure vulnerability and prioritizations;
- Preview of workshop topics.

Trout Unlimited is a national organization with more than 150,000 members organized into about 400 chapters across the U.S., matched by a respected staff of lawyers, policy experts and scientists, who work out of more than 30 offices nationwide. TU's mission is to conserve, protect, and restore North America's coldwater fisheries and their watersheds.
